- Molecular techniques in
clinical microbiology
Molecular biology is the
science of biomolecules.
Even though the term
"biomolecules"
includes all molecules such
as proteins, fatty acids etc,
it is refers to nucleic acid
these days. Wed, 07 Nov

Dextrose, the amino acids
arginine, lysine or ornithine
and the pH indicator
bromcresol purple are
incorporated into the media.
Following the fermentation
of dextrose, there is a drop
in the pH and a change of
color from purple to yellow.

Principle: Staining is an
auxiliary technique used in
microscopic techniques
used to enhance the clarity
of the microscopic
image. Stains and dyes are
widely used in the scientific
field to highlight the
structure of the biological
