structure and function of eye in psychology

Information Technology -
dient lens with a structure
formed from a finite
number of shells.
Corresponding models for
the eye have been proposed
in the literature [36-1],
[36-2]. Figure 36-5 shows
the measured distribution of
the refractive index along
the optical axis of the eye
lens as a function of the
location z. It can be seen
that the value changes
smoothly without steps. Sat,
